For more than 18 years Klutts Equipment has supplied innovative railroad maintenance-of-way equipment to all market segments. Our mission is providing innovative, high quality, safe and economical products and services. The company strives to exceed all expectations of our customers and the marketplace. We provide our employee's growth opportunities with a supportive work environment.

As one of the largest suppliers in the railroad industry we are proud to provide a comprehensive and diversified inventory. Our stock has any required machine for all types of track construction and maintenance. Klutts Equipment can provide anything from one piece of equipment, parts or a complete gang of equipment.

Our employees have more than 100 years of combined service in the railroad industry and are the key to our success. We know that our achievements are dependent upon the accomplishments of our customers. We are dedicated to provide quality and reliability that our customers can depend. This experience and extensive knowledge of hydraulics, mechanics and electrical systems gives Klutts Equipment the leading edge to guarantee the best value of any equipment investment.

Klutts Equipment's ability to build complex designs and deliver the final product to exact specifications ensures customer satisfaction. Whatever the requirements, we will create the right solution from third rail modifications to wide, narrow and standard gauge requirements. We have comprehensive and simplified leasing options that will fit any requirements.

Remanufacturing is the most cost effective option for maximizing equipment productivity and reliability. We set the standard in the industry for quality in remanufacturing.

Why rely on Klutts:

- A staff with 100+ years experience in the Railroad Industry
- Experts in remanufacturing rail maintenance of way equipment
